

Speedball Mid-Fire Glazes

... are an artist-led project developed in partnership with ceramic artist, Nancy Sowder, highlighting how artists shape Speedball's development. This line consists of 30 glazes that create magical mottling and reduction like effects fired at cone 5/6. Get eye-catching results when using each glaze on their own, or try layering colors for even more unique variation! We recommend that you use a normal cooling cycle across all colors to ensure consistent results. All colors shown below are fired on Laguna B-Mix clays at cone 6.
