• recommended for glaze combination overlaps  
 Item numbers in red are not dinnerware-safe

The secret of truly successful glazing at cone 6 is INTERACTION. It's not about the clay alone or the glaze alone, but how the clay interacts with the glaze -- and how the glazes interact with each other. What do you get when you put them together?

[georgies.com/projects](http://georgies.com/projects)  
 For technique sheets, glaze combinations & more

Georgies glazes conform to ASTM D-4236 and are certified nontoxic. Lead-Free Non-Toxic

Glaze sample sets offer full palettes for trying color combinations!
