COYOTE SLOW-COOL GLAZES

The Constellation series of glazes are designed to shine in all kinds of firings. These glazes are unmatched for versatility, changing dramatically depending on how they are used. Thickness, firing temperature, and especially cooling speed can affect these glazes in marvellous ways. Now you can have crystal glazes without running, without seeding, and which you can fire along with your other glazes! By adding controlled cooling to a normal cone 6 firing, these glazes produce spectacular effects that were previously difficult to obtain.
