AMACO OPALESCENT

Although AMACO® Opalescent Glazes may be used on any clay, they develop their greatest opalescence and most interesting textures when applied over red clays. The AMACO® Opalescent Glazes have a high gloss finish when fired. Best results are achieved with three or four applications of glaze. On textured ware, the glaze flows thin on relief and thick in incised areas, giving an added dimension on the surface.

- Best over Red clay or colored Underglazes
- Breaks and pools over texture
- Cone 05 - 1915° F ( at 270° F/hour in the final 200° F of firing) / 1046° C (at 150° C/hour for the final 100° C of firing)

SPECIALTY GLAZES

LINER GLAZES

French Dimensions and Designer Liners are “puffy glazes” for raised design effects such as dots, stripes, squiggles, and outlines. You can use them over or under nonmoving glazes, and over or under each other. French Dimensions and Designer Liners are all food-safe, nontoxic, and nonhazardous when used under normal conditions. Even so, they may not be practical for use on surfaces in contact with food or drink.  
\*Due to chrome pigment reformulations, it is recommended to use SW004 Zinc-Free Clear glaze, when firing to cone 6.
