

DUNCAN CONCEPTS

Versatility and ease of use make Duncan Concepts ideal for artists of all levels. One coat allows for translucent design work, and several coats provide solid color coverage. Concepts can be used with a wide variety of decorating techniques, including majolica. Designed for use with CN2000D Concepts Dipping Glaze, IN1001 Brushing Clear or 26398 Pure Brilliance glazes. Fire between cone 06 - cone 6, however we recommend testing for color shifts when firing to cone 6. See page 40 for clear glazes. Quantity discounts apply on multiples of the same item

***Concepts are hybrid underglazes with glaze ingredients, intended for use on bisque. Do not use Duncan Concepts on greenware!**

SPECTRUM UNDERGLAZE BASE

Make your own underglazes! This underglaze has some frit in it, which acts as a flux to help the stain be a compatible fit with either greenware or bisque. It also has various additives which keep the frit and stain suspended and makes it brush on smooth and easy. It is lead free, non-toxic, and dinnerware safe when covered by a dinnerware safe clear glaze. To get similar colors as the 500 series Underglazes, it is recommended that you mix 1 part dry powder stain to 2 parts wet Underglaze Base by weight. For example, if you put a half pint (8 oz or 228 gms) of SP1050 in a container, you should mix 114 gms of stain with the base. This is only a GENERAL guideline since the strengths of different stains vary and you should test your colors. Be aware that this *can* go up to cone 10 – but it will flux and flow at this higher temperature.
