

VELVET OPAQUE UNDERGLAZES

These semi-transluents offer two finish possibilities. When left unglazed, they have the appearance of soft velour or velvet. Under a matte glaze, they assume a soft, satiny finish, and the colors intensify under a gloss glaze. All Velvets are very rich in color and can be used for all-over coverage similar to an opaque underglaze. They fire true to color as applied from the jar and may be intermixed to produce hundreds of colors. Firing range is cone 05 to cone 10, but go to Amaco's website (www.amaco.com) to see the color shifts that happen at cones 6 - 10. Try HF9 Zinc-Free Clear for a beautiful gloss finish. * We stock V360 & V361 in gallons, all other gallons are special order. Please call for availability.
