## March 2015 Saturday Demos

All demos are on Saturdays from 10am- 2pm. Drop by and share some ideas with us!

### March 7: Extruder and Dies

Come checkout the Georgies handheld extruder and see all the wonderful coils that can be made! Open up your handbuilding repertoire with this wonderful tool!

### March 14: Sprigs & Slump/Hump Molds

Learn how to use and form shapes using plaster sprig molds and hump/slump molds! You can make wonderful shapes and adorn your pieces with these techniques!

**March 21:** In lieu of a demo, today we are having a class! Come make a small pot or bowl using the GEX extruder and coils or hump/slump and sprig molds. Put some of the techniques you learned in the past 2 demos to good use! The class is \$40 and you must pre-register to hold a spot.

**March 28:** Since Maria will be at NCECA there is no demo today! But look for some new ideas and perhaps tools when she returns!
