

## Clear Glaze Dipping Tips

- Store dipping glazes in a cool, dry place away from heat and vibration.
- When dipping, make sure your fingers are dry to prevent smearing.
- While dipping, re-stir the glaze every 15-20 minutes to maintain proper consistency.
- Keep container tightly closed when not in use. Evaporation may cause a slight thickening of the glaze, which can affect its performance on your work.

## DUNCAN

### Brushing Glazes
