

## Crystalites & Jungle Gems

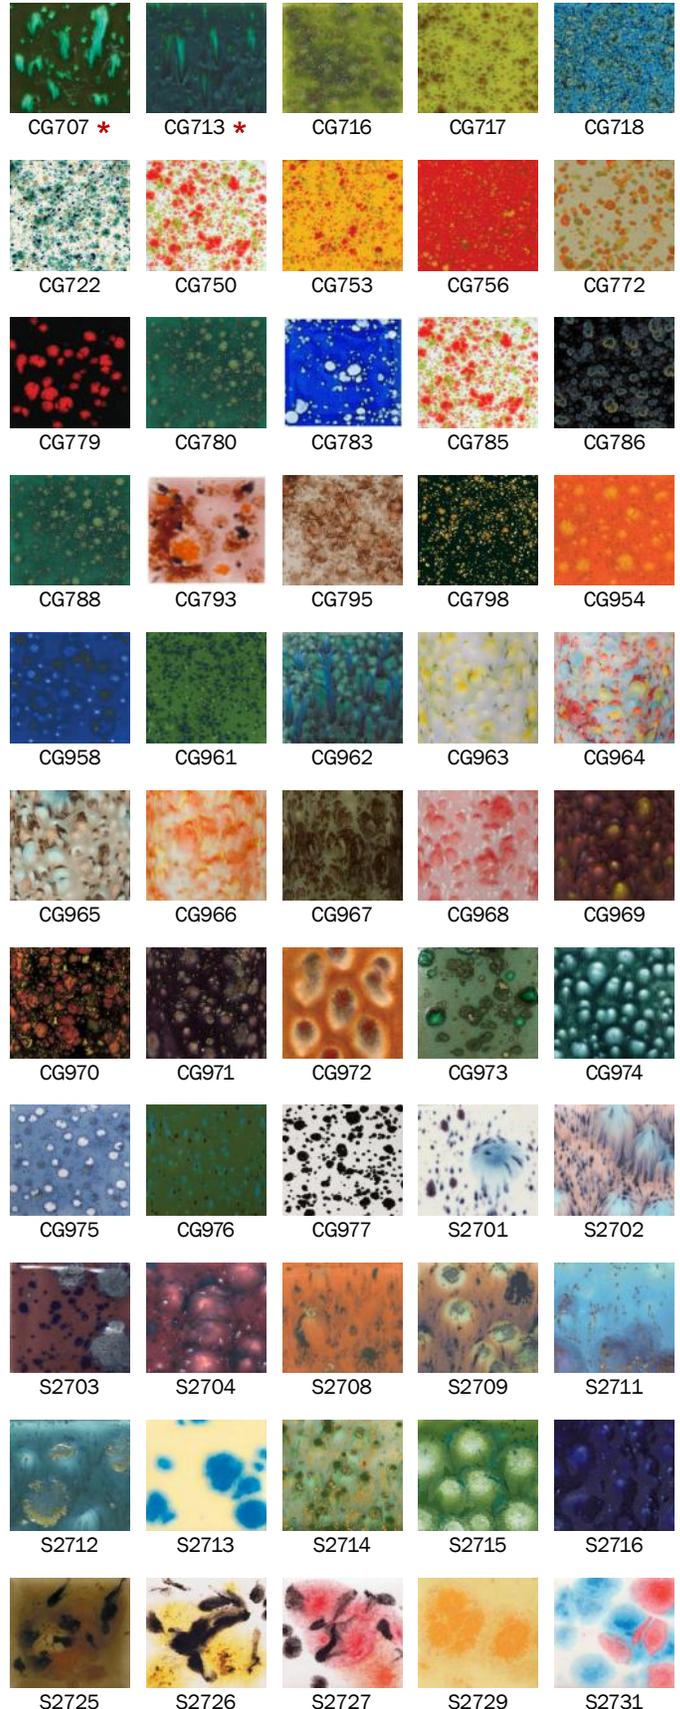

**Crystal Glazes are magical potions in jars!** The dramatic effects are almost endless as the crystals melt and flow during firing. The tiny "rocks" in the glaze are crystals of fired glaze, ground to different sizes and mixed with a contrasting base glaze. Three coats are required for best coverage. Mayco crystal glazes are all leadfree and nontoxic, but may not be suited for contact with food or drink surfaces because of fired surface characteristics or possible crazing. *(Call for pricing and availability on pints.)*

**Glazes marked with an asterisk\* bear Caution labels. Unmarked glazes are certified nontoxic.**
