

### Velvet Opaque Underglazes

Velvet semi-transluents offer two finish possibilities. When left unglazed, they have the appearance of soft velour or velvet. Under a matte glaze, they assume a soft, satiny finish, and the colors intensify under a gloss glaze. All the Velvets are very rich colors and can be used for all-over coverage similar to an opaque underglaze. They fire true to color as applied from the jar and may be intermixed to produce hundreds of colors. (All colors on this page have net prices: no discounts apply.)
