

Geil HVLP Spray Gun

HVLP stands for "High Volume Low Pressure," which perfectly describes this spray gun designed exclusively for glazes and slips. Apply even coats in a short time while cutting down significantly on overspray, wasted materials and environmental pollution. Hose and compressor are sold separately. Geil recommends using only 15-gallon, 2½-hp compressors which provides 30-50 PSI because this gun works on low pressure.

Glaze Sprayer

Use the power of your breath to quickly and easily spray glazes or oxides on your clay work! Inside the metal container is a tiny tube from the bottom to the top. When you blow through the top pipe, your breath creates suction that pulls the liquid up through the vertical tube, and the liquid exits the sprayer as a mist.
