Quantity discounts apply on multiples of the same item.

Jim Gion Tools

Jim Gion is a nationally and internationally renowned sculptor, working with portrait, figure, and abstract subjects in clay and bronze. Jim lives here in Portland, and we have been honored to have him teach classes here at Georgies on several occasions. based on his experience of what tools he found useful, he designed this set of polished hardwood modeling tools to supply shapes and textures that he found lacking in other tool lines. These tools vary in size from about six to about 9 inches, and their finish is so smooth they feel good in your hands as you use them.
