

Mayco Silkscreens

Mayco Designer Silkscreens are a great and easy way to add intricate detail to your work.

Combine AC-310 Silkscreen Medium with underglazes, Stroke & Coats or Designer Liner to create a ceramic "paste", and rub the paste through the screen onto your piece. The screen size is 12½"h x 18"w, with the actual printed area measuring 11½"h x 15"w. Except for the stripes and chevrons, designs are arranged on each sheet with planned gutters so you can fold without affecting other designs. The screens are lightly folded and the crease does not impact design reproduction. Individual designs are approximately 3" to 4" at their longest dimension.

DSS0114
"Creepy"

Silkscreens are \$18.00 each (net).

| | 6-11 | \$2.22 ea |
| | 12+ | \$1.77 ea |

Laser Decal Transfer Paper

- Decals are monotone only, not in color. The black image on the paper fires to sepia-to-brown colors.
- Each pack contains 10 sheets.
- Step-by-step, easy-to-follow firing instructions are included with each pack of transfer paper.
- Fired-on images have been certified as lead and cadmium free, and are safe for use on dinnerware.

(This low-fire tile was done by applying the decal to the bisque, doing a 2nd bisque to set the decal on, and then using washes of EZ Stroke to tint the image. Duncan Pure Brilliance was brushed over all and fired to cone 05.)

TP Laser Decal Transfer Paper \$38.00
